

Post Exposure Prophylaxis Follow Up Options and Lab Studies

1. MVH Employees (including Physicians)

- Call AO or Resource Nurse. They will arrange all labs, paperwork and follow up.
- During working business hours patient should be sent to Employee Health.

2. Work Related **See Needlestick Orderset

- Diagnostic Labs for exposed patient (Recommended Only)
 - HIV Antibody
 - Hepatitis B Antibody
 - Hepatitis B Surface Antigen
 - Hepatitis C Antibody
- Baseline Labs if Starting PEP:
 - Hepatic Function Test
 - CPK
 - CBC with Differential
 - Amylase
 - BMP
 - UA
 - Urine HCG if a female

3. Non-Work Related

- Labs at your discretion-- depending on follow up.
- Recommend baseline labs as above if starting PEP
